From: Michael Hetmer & Benji Lyons
RE: Weight Rule Change

After talking with Benji Lyons, the track has decided to implement a New Late Model weight rule. The weight rule will be Cast / Steel Engines will be a minimum of 2200 lbs and Aluminum Engines will be a minimum of 2300 lbs. The rule change will be in affect starting this weekend. This change will help bring the Late Model Divisions across Southwest together.

Just for any clarification as stated in the RGSLM Rules the track rules supersede the RGSLM Rules.

1.1 – General

(A) The Race Director and Tech Director will outline and control activities for each race event. Each racing facility's procedures shall supersede any of our rules or regulations.

Thank You,

Michael Hetmer
